Special 130

The Brand Issues

Special 130® is the advanced solution for a perfect coverage in rolling up the bales.

Robust and containment, exceptionally covering thanks to the ability to relax naturally from edge to edge, Special 130® is confirmed as the ideal network for XL sizes!

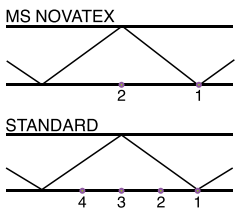

Exclusive features guarantee perfect bales capable of long-lasting protection against heavy handling. More convenience. Since the cost of the wrapping is low it is much better using a performing net rather than losing the whole bale because of a second-rate net.

Features

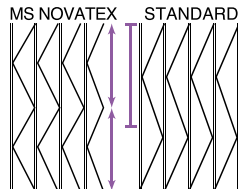

Roll Length	2000 m	2600 m	3000 m
Roll width	130 cm	130 cm	130 cm
Max roll diameter	25 cm	25 cm	27 cm
Guaranteed minimum strength	280 kg	280 kg	280 kg
Medium strength	295 kg	295 kg	295 kg
Mesh type	MS - Narrow Mesh		

Special 130

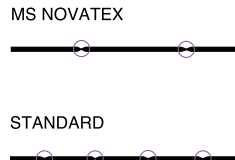

► Fewer Knots: Safer Bales

The knot is a critical issue in a wrapping net. That's why Novatex net has half the quantity of knots. It is safer, it has more resistance against breakage even after heavy long-lasting handling.

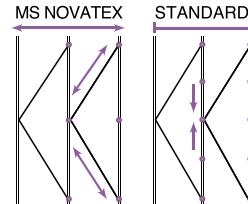

► Higher mesh density

Novatex nets have:
- a higher number of meshes per meter
- much more grip which means more compression for the bale

► More robust chain construction

Thanks to fewer knots the thread works easily and quality is increased by a more robust chain construction.

► Flexible Geometrical Structure

Thanks to its exclusive Technology, Novatex net is softer and its mesh naturally fits the wrapping system. Its Edge-to-edge effect enhance the bale covering.
