

EURO bagging

Just bag it!

EC 22

Small farm crimper bagger for maize corn and cereals

The mobile crimper named the EUROCRACKER is equipped with one crimper unit with V-shaped discs, which do not need as much power in comparison with conventional cylindrical rollers. Thanks to the various circumferential speeds at the disc's junction point, the grain is disrupted better and more evenly. The machine preserves the grain in a bag with a diameter of 1,5 or 2,0 meter.

Your Dealer:

- » High-quality V discs made of refined steel
- » Belt drive with low noise and low maintenance frequency
- » Easy operation, strong drive-line
- » Low investment, cost efficient

Basic features:

Hopper with a volume of 2.5 cubic meters

Belt drive – silent operation

Centralized lubrication points outside the machine

Hydraulic sliding doors under the hopper

Hand brakes for bag pressure adjustment

Dust exhaust directed to hopper

Inspection probe for sampling the grain

1,5m tunnel

Acid pump 7 l/min, holder for barrel

Optional equipment:

Tunnel 2,0 instead of 1,5m

Eurocracker

Technical details:

Tunnel performance	m	1.5 / 2.0
Tractor power	Hp	80 - 140
Crimping capacity *	T/h	10 - 18

Machine dimensions

Length	mm	4350
Width	mm	2580
Height	mm	2750
Machine weight	kg	2100

* Depending on the corn type, moisture, weather
