Westfalia Novatex

The Brand Issues

Westfalia Novatex is a trademark evoking in its users such values as quality, performance and reliability. Westfalia Novatex has undergone a major product upgrade, and it comes greatly improved. Its characteristic colour pattern, with wider and more asymmetrical green stripes to define the left and right sides. A new end-of-roll warning, which could only be green!

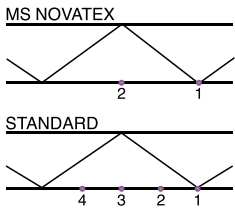

Exclusive features guarantee perfect bales capable of long-lasting protection against heavy handling. More convenience. Since the cost of the wrapping is low it is much better using a performing net rather than loosing the whole bale because of a second-rate net.

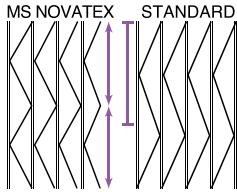

Roll Length	2000 m	2600 m
Roll width	123 cm	123 cm
Max roll diameter	25 cm	25 cm
Strength	280 kg	280 kg
Medium strength	290 kg	290 kg
Mesh type	MS - Narrow Mesh	

Westfalia NOVATEX

Fewer Knots: Safer Bales

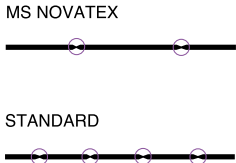

The knot is a critical issue in a wrapping net. That's why Novatex net has half the quantity of knots. It is safer, it has more resistance against breakage even after heavy long-lasting handling.

Higher mesh density

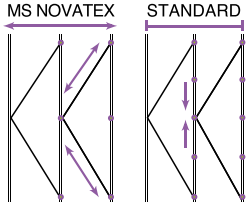

Novatex nets have:

- a higher number of meshes per meter
- much more grip which means more compression for the bale

More robust chain construction

Thanks to fewer knots the thread works easily and quality is increased by a more robust chain construction.

Flexible Geometrical Structure

Thanks to its exclusive Technology, Novatex net is softer and its mesh naturally fits the wrapping system. Its Edge-to-edge effect enhance the bale covering.
